

CLAIMS

I claim:

1. A seatbelt handle used in coordination with a motor vehicle seat and
shoulder belt comprising:
5 a single piece seat belt attachment comprising a base which when wrapped
around the seatbelt attaches to it securely; and
a handle easily reachable, which extends toward the front of the vehicle
when in the retracted position in its ready to use position.
2. The seatbelt aid of claim 1, further comprising a base that securely fastens
10 to the seatbelt.
3. A seatbelt attachment, comprising: a loop that when in its ready to use
position, protrudes forward and is positioned such that a driver may, by
simply bending his or her arm toward his or her shoulder, the loop of the
seat belt attachment will be easily grabbed and pulled without over
15 stretching and reaching back as in conventional seat belt arrangement.
4. The seatbelt attachment of claim 3, further comprising two large surfaces
for advertising and billboarding.
